

SA Series(Wiring System: DIN Connector Type) Wet Type Solenoid Valve

100 to 160ℓ/min
35MPa

Features

- ① Very long life
The movable iron core of the wet type solenoid is immersed in oil, which keeps it lubricated and cushions it from impact and vibration, ensuring very long life.
- ② Low switching noise
The wet-type solenoid valve provides very low core switching noise, for quiet operation.
- ③ Shockless
A switching speed adjustment mechanism enables direct, shockless operation (Option F).
- ④ No surge voltage
Sparking and surge voltage during solenoid switching is canceled for stable switching (Option G).
- ⑤ Easy coil replacement
A DIN connector type coil enables one-touch coil replacement.
- ⑥ Wide-ranging backward compatibility makes it simple to replace previous valve models with this one. Combining this valve with a modular valve contributes to the compact configuration of the overall device.
- ⑦ Global support (G01 size)
Meets overseas safety standards (CE, UL, and CSA). It can be safely used anywhere in the world. Contact your agent for certified products.

	Single Solenoid	1.4	1.5		3.5	4.1	
Operating Environment	Dust Resistance/Water Resistance	JIS C 0920 IP65 (Dust-tight, Waterjet-proof) (Note 2)					
	Ambient Temperature	-20 to 50°C					
	Operating Fluid	Temperature Range	-20 to 70°C				
		Kinematic Viscosity Range	15 to 300mm ² /s				
	Filtration	25 μm or less					
Mounting bolt	Size × Length	M5×45 (Four)			M6×70 (Four) (M8×70 (Four))		
	Tightening Torque	M5 5 to 7N·m{51 to 71kgf·cm}			M6 10 to 13N·m{102 to 133kgf·cm} (M8 20 to 25N·m{204 to 255kgf·cm})		

- Note) 1. Maximum operating pressure depends on the valve type. For details, see page E-13.
 2. The power supply type for E* is IP64 (dust-tight, splash-proof).
 3. For mounting bolts, use bolts of 12.9 strength classification or equivalent.
 4. Mounting bolts are not included with the 01 size. Bolts are included with the 03 size.

● Handling

- 1 In order to realize the full benefits of the wet type solenoid valve, configure piping so oil is constantly supplied to the T(R) port. Never use a stopper plug in the T(R) port.
- 2 Ensure that surge pressure in excess of the maximum allowable back pressure does not reach the T port.
- 3 Note that the maximum flow rate is limited when used as a four-way valve, or by blocking ports for use as a two-way valve or one-way valve.
- 4 Always keep the operating fluid clean. Allowable contamination is class NAS12 or less.
- 5 When using petroleum type operating fluid, use JIS K 2213 Class 1 or Class 2, or equivalent.
- 6 For details about using fire-resistant hydraulic fluid, see page D-1 for more information.
- 7 Use this valve only within the allowable voltage range.
- 8 Do not allow the AC solenoid to become charged until you install the coil into the valve.
- 9 In the case of operation symbols A2X, H2X, and E2X, run drain piping from the valve T port.
- 10 Maintaining a switching position under high pressure for a long period can cause abnormal operation due to

hydraulic lockup. Contact your agent when you need to maintain a switching position for a long period.

- 11 When using a detent type (E2X, 3X, E3Z), use constant energization in order to securely maintain the switching position.

12 Note that manual pin operating pressure changes in accordance with tank line back pressure.

13 The series described in the table below are available for use as the RSA Series solenoid control relief valve.

RSA-***-AR*(H)-** ¹⁵ ₂₃	SA-G01-AR-**-31
RSA-***-AQ*(H)-** ¹⁵ ₂₃	SA-G01-A3X-**-31
RSA-***-F(H)-** ¹⁵ ₂₃	SA-G01-A8X0-**-31

- 14 The coil surface temperature increases if this valve is kept continuously energized. Install the valve so there is no chance of it being touched directly by hand.

15 Use the following table for specification when a sub plate is required.

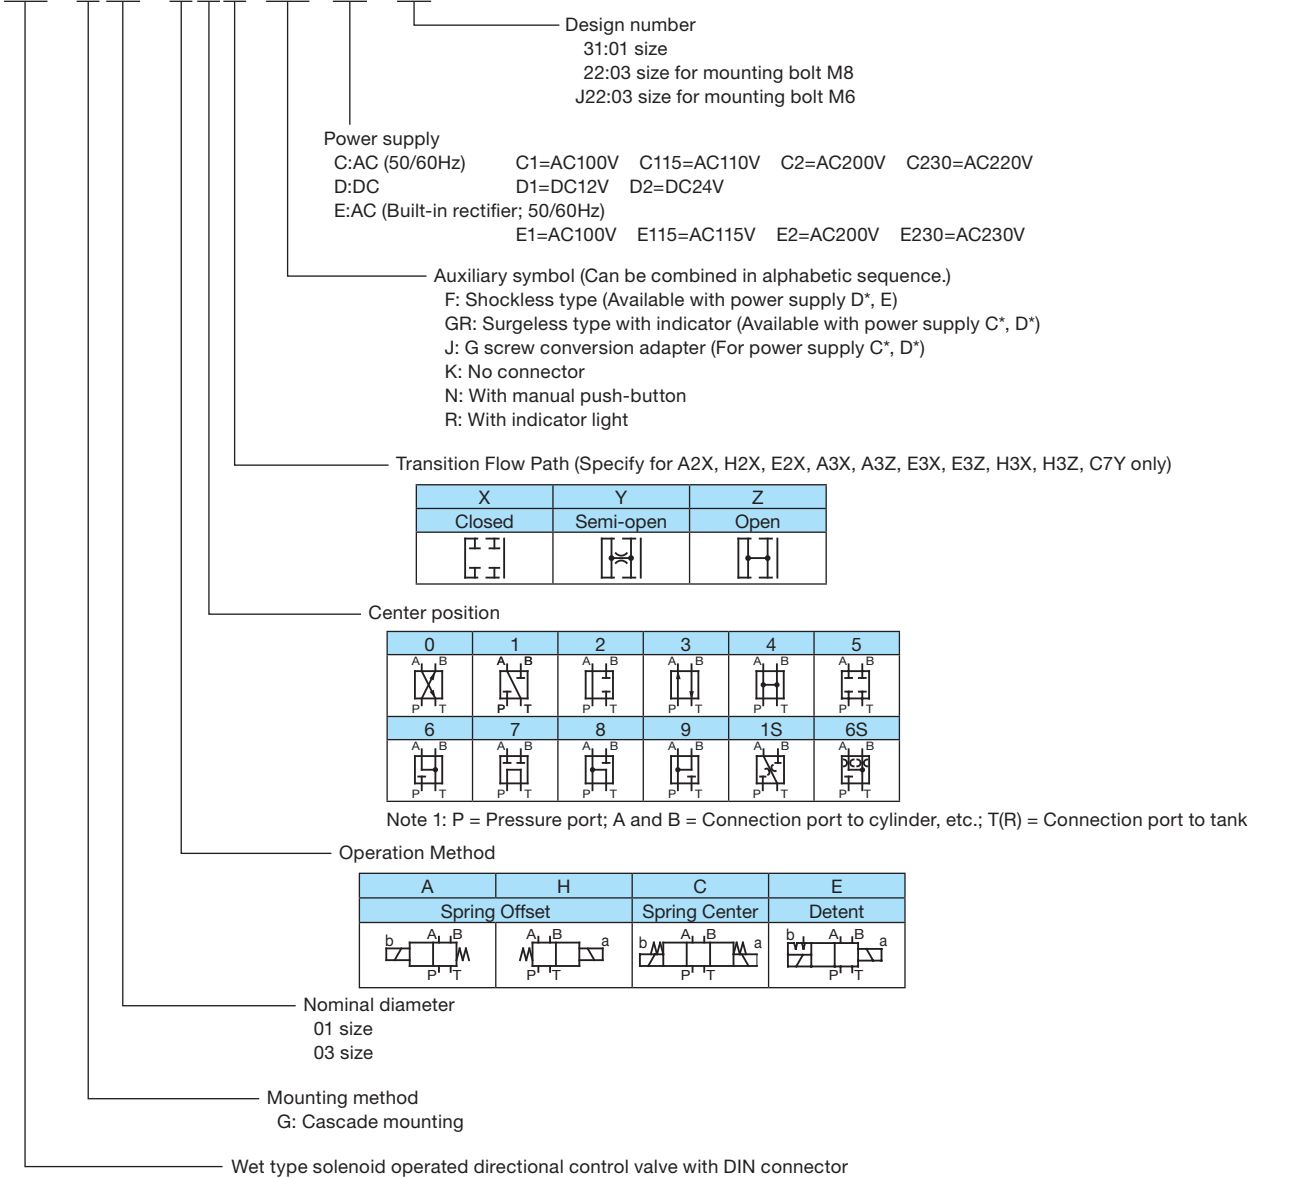

Model No.	Pipe Diameter	Maximum Working Pressure MPa(kgf/cm ²)	Recommended Flow Rate (ℓ/min)	Weight (kg)	Applicable Valve Type

● Connectors

Model No.	Wiring	Electrical Circuit Diagram
SA-G01-***-C* 31 SA-G03-D* (J)21 (EA41-1A)	 <p>Connect the power supply to terminals No.1 and No. 2. The ⊕ terminal is ground. Use this terminal as required.</p>	 <p>(In the case of D*: ±)</p>
SA-G01-***-R-C* 31 SA-G03 (J)21 (EA41-R*-1C)		
SA-G01-***-GR-C* 31 SA-G03 (J)21 (EA41-GRC*-1C)		
SA-G01-***-R-D* 31 SA-G03 (J)21 (EA41-DR*-1C)		
SA-G01-***-GR-D* 31 SA-G03 (J)21 (EA41-GRD*-1C)		
SA-G01-***-E* 31 SA-G03 (J)21 (EA42-1B)		
SA-G01-***-R-E* 31 SA-G03 (J)21 (EA42-R*-1B)		

Symbols in parentheses indicate connector configuration.

Note) 1. Asterisks in the connector configuration and power supply symbols are fillers for the voltage symbol (1 or 2).

2. The connector cord diameter is ϕ 8 to ϕ 10. Anything outside this range causes water tightness to be lost.

3. The orientation of the connectors can be changed in 90° increments by changing the terminal block.

4. The cover cannot be removed unless the installation screws are removed.

5. When J is specified for the auxiliary symbol, a G screw conversion adapter is attached to the connector, and the wiring port is a G (previously PF) 1/2 screw (standard: PG11). EA42 and EA42-R* also have a G (previously PF) wiring port.

6. Use M3 for round type and Y type solderless terminals.

7. Tighten the M3 screws that secure connectors and terminals to a torque of 0.3 to 0.5N·m (3.1 to 5.1kgf·cm).
